## B.Tech. DEGREE EXAMINATION, MAY 2022

Sixth Semester

18CSC363J	- COMPUTER NETWORKS from the academic year 2018-2019 to 2019-2020) thin first 40 minutes and OMR sheet should be had
(For the candidates admitted	MR sheet within first 40 minutes and OMR sheet should be had 40th minute.
(For the carry	sp. cheet within first 40 minutes and ONIK success
Note: Part - A should be answered in ON	A0th minute.
(i) Part - A should be answered in Or over to hall invigilator at the end of	wer hooklet.
(ii) Part - B should be answered in answ	Max. Marks
Time: 21/2 Hours	Marka BL C
- : DT 1/25	× 1 = 25 Marks)
Answer Al	ral time is known as
1. The variation in the packet arriv	(B) Jitter
(A) Delay	(D) Timeliness
(C) Delivery	1 1
	veen an inquiry and a response.  (B) Inter arrival time
2 is the elapsed time bety	(B) Inter arrival time
(A) Transit time	(D) Mean time
(C) Response time	
	1 2
3. In which layer NICS works?	(D) D-t- link layer
(A) Physical layer	(B) Data link layer
(C) Network layer	(D) Transport layer
	or 10 mbps Ethernet is bytes.
4. The maximum frame length for	or 10 mbps Ethernet is bytes.
(A) 1500	(B) 1316
(C) 64	(D) 46
	in used by IEEE 802 11 standard for 1 1
<ol><li>Which multiple access technical</li></ol>	nique is used by IEEE 802.11 standard for 1 1
wireless LAN?	(D) ATOUA
(A) CSMA/CA	(B) ALOHA
(C) CDMA	(D) CSMD
6 What is the Hamming distance	te for the code word d(00000, 11111)?
(A) 0	(B) 1
	(D) 5
(C) 4	(2)
7. In block coding, we divided	our message into blocks, each of K bits called
(A) D	(D) Cada wards
(A) Data words	(B) Code words
(C) Redundant bit	(D) Parity check code
8. What is the vulnerable time	for pure ALOHA protocol?
(A) 2 * T <sub>fr</sub>	(B) $T_{fr}$
	*
(C) $3*T_{fr}$	(D) $4*T_{fr}$

9. In stop-and-wait protocol, both the sender window of size  (A) 2 <sup>m</sup> (B) 2 <sup>r</sup>	7-1	1 2	2	4		FTP server listens to connection on port  (A) 19 and 20 (B) 21 and 22 (C) 20 and 21 (D) 20 and 22	ı
(C) 1 (D) n  10. Assuming even parity, find the VRC for data (A) 0 (B) 1 (C) 00 (D) 01	units 0001100	1 2	2	2)		The characters are sent to the TELNET client, which transforms the characters into universal character set called and delivers them to the local TCP/IP stack.  (A) Network address translation (B) Network virtual terminal (D) Network remote terminal	ı
11. Find the class of IP address 11110000 101010 (A) A (B) B (C) C (D) E	010 11111111 00000000	1 2	3	i		Fully qualified domain name is terminated by string.	
12. A packet has arrived in which the offset value of the first byte?  (A) 4 (B) 5	e is 100. What is the number	1 2	3	t:	24.	SNMP uses the services of UDP on two well-known ports and 1 1 5 1  (A) 141 and 142 (B) 151 and 152  (C) 161 and 162 (D) 171 and 172	
(A) 4 (B) 5 (D) 7  13. The protocol defined by internet layer in TCP (A) TCP (B) UD (C) SNMP (D) AR	OP IS	1 1	3	13	25.	In non persistent connection, if a file contains links to N different pictures in different files (all located on same server) the connection must be opened and closed times.  (A) 1	
14. The internet control message protocol has the h (A) 12 bytes (B) 10 b (C) 8 bytes (D) 6 by	oytes	1 2	)	1		PART – B (5 × 10 = 50 Marks)  Answer ALL Questions	ю
15. DHCP uses UDP port for sending data	to the server.	2	3.	1	26. a.i	. For 6 devices in a network, what is the number of cable links and I/O ports 6 3 1 required for a mesh, ring and bus topology.	E
(A) 66 (C) 68 (D) 69 16. The minimum size of a UDP datagram would be (A) 4 (C) 20 (B) 8 (B) 8 (D) 28	ebytes.	1 2	4	1	i	In 802.11 network, there are three stations A, B and C. Station C is hidden from A, but can be seen by B. Now assume that station A needs to send data to station B. Since C is hidden from A, RTS frame cannot reach C. Explain how station C can find out that the channel is locked by A and that it should refrain from transmitting.	1
7. A port address in UDP is bits long. (A) 8 (B) 16 (C) 32 (D) 4		2			b	(OR)  Assume that a private internet requires that the messages at the application layer be encrypted and decrypted for security purpose. If we need to add some information about the encryption/ decryption process, does it mean that we are adding one layer to the TCP/IP protocol suite? Redraw the	
(C) Randomly generated number (D) 0	omly assigned node	1	4	1		TCP/IP layers if you think so.  i. A light signal is travelling through a fiber. What is the delay in the signal if the lengths of the fiber-optic cable are (1) 5 m and (2) 500 m. (Assume a	1 ×
TCP groups a number of bytes together into a pact (A) Packet (B) Frame (C) Buffer (D) Segme DNS can use the service of either TCP or UDP to	eker called					propagation speed is $2 \times 10^8 m$ )?  a. The message 10100111 is to be transmitted using CRC error detection  algorithm. Assuming the CRC polynomial to be $x^4 + x^2 + x + 1$ , determine the message that should be transmitted. If the second left most bit is	2 2
(A) 53 (C) 21 (B) 20 (D) 52						corrupted show that it is detected by the receiver.  (OR)	on water

5 3 2 3
anives
b.i. In the stop and wait protocol, show the case in which the receiver receives  a duplicate packet (which is also out of order). Hint: Think about a delayed  a duplicate packet (which is also out of order). Hint: Think about a delayed  a duplicate packet (which is also out of order). Hint: Think about a delayed  a duplicate packet (which is also out of order). Hint: Think about a delayed  b.i. In the stop and wait protocol, show the case in which the receiver receives  a duplicate packet (which is also out of order). Hint: Think about a delayed
show the case in Which Think about a delayed
b.i. In the stop and wait protocol, b.i. In the stop and b.i. In the stop a
b.i. In the stop and wait protocol, as out of order). Hinter a duplicate packet (which is also out of order) and the duplicate packet (which is also out of order) and the duplicate packet (which is also out of order) and the duplicate packet (which is also out of order) and the duplicate packet (which is also out of order) and the duplicate packet (which is also out of order) and the duplicate packet (which is also out of order) and the duplicate packet (which is also out of order) and the duplicate packet (which is also out of order) and the duplicate packet (which is also out of order) and the duplicate packet (which is also out of order) and the duplicate packet (which is also out of order) and the duplicate packet (which is also out of order)
ACK. What is the reaction of a whole of 10 mbps. If the maximum
TO IA CD has a bandwidth of To standard
A network using CSMACDUS, what is the minimum
ACK. What is the reaction of a ACK. What is the reaction of a bandwidth of 10 mbps. If the maximum is A network using CSMA/CD has a bandwidth of 10 mbps. If the maximum is A network using CSMA/CD has a bandwidth of 10 mbps. If the maximum is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, what is the minimum size for standard propagation time is 51.2 µs, which is the minimum size for standard propagation time is 51.2 µs, which is the minimum size for standard propagation time is 51.2 µs, which is the minimum size for standard propagation time is 51.2 µs, which is the minimum size for standard propagation time is 51.2 µs, which is the minimum size for standard propagation time is 51.2 µs, which is the minimum size for standard propagation time is 51.2 µs, which is the minimum size for standard propagation time is 51.2 µs, which is the minimum size for standard propagation time is 51.2 µs, which is the minimum size for standard propagation time is 51.2 µs, which is the minimum size for standard propagation time is 51.2 µs, which is the minimum size for standard propagation time is 51.2 µs, which is the minimum size for standard pro
Ethernet frame?  Ethernet frame?  28. a.i. A block of addresses is granted to an organization like SRM and we know that one of the address is 210.10.5.6/28. Find the first address, last that one of the address is the block.
represented to an organization the first address, last
28 a.i. A block of addresses is 210.10.5.6/28. Find
28. a.i. A block of addresses is granted to an organization like SRM and we have that one of the address is 210.10.5.6/28. Find the first address, last that one of the addresses in the block.  addresses and number of addresses in the block.
addresses and number of a suides how many subnets and
addresses and number of addresses in data addresses and number of addresses and number of addresses in data addresses and number of addres
ii. The network address
hosts:
(OR) OXB43555102220.
b.i. A host with IP address 150.10.0.0 and physical address OAB address address b.i. A host with IP address 150.10.0.2 and physical address ether host with IP address 150.10.0.2 and physical address address address address between the same Ethernet network.
Another host with IP address 150.10.0.2 and physical Another host with IP address 150
OXA46FF45983AB. The two hosts are on the OXA46FF45983AB.
ii. Write the significance of BOOTP.
ii. Write the significant
29. a. Explain the congestion control techniques used to improve QoS of the
computer network.
(OR) to design beyodecimal format.
b. 0045DF0000580000 is a contents of a UDP header in hexadecimal format.
What is the source port number.
syn a the destination port number:
(iii) What is the total length of the user datagram.
(iv) What is the length of the data?
(v) What is the application layer protocol?
30. a. Both HTTP and FTP can retrieve a file from a server. Which protocol we 10 4 5
use to download a file? Explain that protocol in detail.
(OR)
b Professor Mark Allen Weiss sending congratulations email to professor
Forougan for his book publication. Here you have to explain, what are the
protocols used to send Emails and also explain about the transaction
request and respond commands reacted to the transaction. (Hint: Explain
during transaction how the connections are established, email transferred
and how connections are terminated)
